LUXURY PLOTTED DEVELOPMENT

Find your purpose here

The pursuit *of happiness.*

This development draws inspiration from the ancient Japanese concept - Ikigai, which means 'reason for being.'

The idea of Ikigai is to elucidate the purpose of life; the reason we wake up to usher in a new day. It combines four elements - what you love, what you are good at, what the world needs, and what you can be paid for, to arrive at the innate purpose present in us all.

A purpose that some have discovered and some are yet to.

At Assetz Atmos & Aura, we provide spaces designed keeping in mind this ideology, where each individual can live out their life's purpose and discover their true self.

PLOTS

1.5 acres

OF GREEN + OPEN SPACES

How are we helping in finding one's Ikigai?

Through a green-filled space.

70-125 Sqft

OF SOOTHING GREENS
WITH EVERY PLOT

We believe the best way to find Ikigai is by creating something that not only serves you, but the community as a whole. For the same reason, each home at Assetz Atmos & Aura comes with a dedicated green space, through which one can discover, create, and give back.

A space to **discover.**
create.
give back.

A greener way of life.

To elevate the experience of discovering one's Ikigai, each dedicated green space also comes with its own tree, one that you can nurture and grow, and call your own. These native-friendly trees not only add a level of beauty to your surroundings but also help preserve nature and maintain a lower temperature within the project walls.

Our intention is to promote a greener way of life, one that encourages harmony between man and earth. For you to rediscover your connection with the nature, we have added a canopy of trees on the driveway leading up to your home. Only a life of serenity awaits you here.

Happiness can be found in unexpected places.

About Assetz

Our mission is to balance the need to break through the clutter of a highly competitive market where trends have a very short shelf life, with the demands of cost and investor confidence. A way to not succumb to this is to respond to factors that are immutable to the site and the surrounding context and not to passing trends.
